All you need within reach

Modern lakeside holiday homes, plus great fishing!

ELMHIRST Lakes is a beautiful and peaceful holiday retreat, ideal for anglers and non-anglers seeking a relaxing break within an easy walk of the small market town of Horncastle and its inns and cafés.

On site are three coarse ponds and a specimen lake holding carp to 30lb, roach to 3lb and a host of other species for a few surprises during your session.

The fishing is superb, and you can find the same quality in the accommodation on offer. The range of static caravans and lodges all offer TV/DVD, fridge and microwave, and some have

en suite facilities to the main bedroom. All are beside the main lake, with superb views over the water. All the accommodation is carefully cleaned prior to your arrival, so you'll feel at home from the start. Parking is directly next to your accommodation, so long walks are not an issue.

When you're not relaxing in your comfortable static home you'll be getting down to some

rod-bending action across four idyllic waters. All have mixed stocks and you can catch plenty of big roach, tench, bream and crucians by fishing maggots on the pole or waggler over a little groundbait in the margins.

Alternatively, you can mount a specimen-style attack for the carp with boilies and pellets and simply sit back and relax, taking in the surroundings... at least until your alarm screams off!
